

Functional & Performance Testing Template

Functional & Performance Test

Date	02 October 2026
Team ID	SWTID-2026-4912
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	10 Marks

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Employee / Job-Role Input Validation	Enter valid and invalid employee and job-role details in the laptop request form	Valid inputs accepted, errors shown for invalid inputs	Valid job-role details accepted; invalid entries rejected with an error message	Pass
FT-02	Budget Input Validation	Enter budget values within and outside the permitted range	Accepts valid budgets, flags out-of-range values	Budgets in range accepted; out-of-range budgets flagged	Pass
FT-03	Standard Laptop Recommendation (CPU, RAM, storage, GPU)	Select a job role with standard requirements and submit the request	Matching approved standard laptop configuration is recommended	Approved standard configuration recommended for the selected job role	Pass
FT-04	Non-Standard Requirement Detection	Enter requirements that exceed the approved standard configurations	Request is flagged as non-standard and routed to the approval workflow	Request flagged as non-standard and routed to the approval workflow	Pass
FT-05	Procurement Request Generation	Submit a valid standard request and check the generated procurement request	Procurement request is created automatically with correct details	Procurement request created automatically with correct details	Pass

FT-06	Flow Designer Flow Execution Check	Submit a request and check that the flow triggers and completes	Flow runs end to end without errors	Flow triggered and completed without errors	Pass
PT-01	Response Time Test	Use a timer to check the time taken to generate a recommendation	Recommendation is generated in under 3 seconds	Recommendation generated in about 2 seconds	Pass
PT-02	Concurrent Request Test	Submit multiple laptop requests at the same time	Flow should not slow down and all requests are processed correctly	All simultaneous requests processed correctly with no slowdown	Pass
PT-03	Bulk Request Load Test	Submit a large batch of requests and check processing	Should work smoothly without failures	Batch processed smoothly without failures	Pass
