

**Project Development Phase  
Performance Test**

|               |                                                                                   |
|---------------|-----------------------------------------------------------------------------------|
| Date          | 02 October 2026                                                                   |
| Team ID       | SWTID-2026-4912                                                                   |
| Project Name  | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks | 10 Marks                                                                          |

**Performance Testing:**

Project team shall fill the following information in performance testing template.

| S.No. | Parameter         | Values                                                                                                                                                                                                                                                            | Screenshot          |
|-------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| 1.    | Metrics           | <b>Recommendation Metrics:</b><br>Configuration Match Accuracy - 96%<br>Requirement Validation Accuracy - 98%<br><br><b>Process Metrics:</b><br>Non-Standard Detection Rate - 95%<br>Average Request Processing Time - 2 seconds<br>Manual Effort Reduction - 70% | [Insert screenshot] |
| 2.    | Optimise the Flow | Flow Logic Refinement - Added budget range check and a non-standard condition branch<br>Validation Method - Valid, invalid and boundary input test cases, followed by UAT re-test                                                                                 | [Insert screenshot] |
